Organic Acids Profile & Environmental Pollutants Profile

Environmental Pollutants Testing – Food Restrictions
Preservatives need to be avoided for 48 hours before collection.

Sorbic Acid/Sorbate (preservative) (E200-203)
Benzoic Acid/Sodium Benzoate (preservative) (E 210-213)

Read this document carefully before using the contents of this package.

These profiles are not suitable for children younger than 2 years old. US Biotek Laboratories’ Specimen Collection and Shipping Instructions are permitted for use under the guidance of a healthcare practitioner.

US Biotek Laboratories Organic Acids Profile & Environmental Pollutants Profile Kit is intended to be used as a medium to collect and transport a urine specimen to the laboratory for testing. Prescription only.

Medications
We strongly recommend consulting your healthcare practitioner prior to making any changes to your current medication regimen.

Warnings and Precautions

• Avoid collection during menstruation or urinary tract infection.

• Avoid excessive fluid intake the evening prior to urine collection. An overly dilute urine specimen may be rejected.

• Supplements and medications may impact results. Please consult with your healthcare provider.

• Keep out of reach of children.

Intended Use

US Biotek Laboratories Organic Acids Profile & Environmental Pollutants Profile Kit is intended to be used as a medium to collect and transport a urine specimen to the laboratory for testing. Prescription only.

Medications

We strongly recommend consulting your healthcare practitioner prior to making any changes to your current medication regimen.

Warnings and Precautions

• Avoid collection during menstruation or urinary tract infection.

• Avoid excessive fluid intake the evening prior to urine collection. An overly dilute urine specimen may be rejected.

• Supplements and medications may impact results. Please consult with your healthcare provider.

• Keep out of reach of children.
To avoid rejections, follow these points:

- Missing or incomplete test request information will delay processing and extend turn-around time.
- Nicknames or abbreviated names are not acceptable.
- Patient’s name on the Test Requisition Form and Collection Strip must exactly match.
- Missing or incomplete information on the test requisition form will delay the processing time of your specimen.

Acceptable drying methods include:

1. Air Dry
2. Blow Dry

Follow collection instructions carefully.

1. On the Collection Strip, clearly print your Name, Date of Birth, Gender, and Collection Date.
2. Collect first morning urine before food and drink. Or, first urine after your longest stretch of sleep.
3. Collect urine into any clean cup Void first portion of urine.
4. From mid-stream on, fill cup with urine
5. Do NOT touch Absorbent Pads.
6. Place Absorbent Pad portion of Collection Strip into the cup, and leave them inside the cup for 15 seconds to ensure full saturation.
7. Take Collection Strip out of the cup, briefly allowing them to drip feely.
8. Air dry strip for at least 12 hours. Humid conditions may prolong this drying time. Absorbent Pad may drape and touch Collection Strip.
9. Once fully dried, tuck the cover into flap as indicated. Indicate strip drying method on the back of the strip.
10. Place DRIED strip into the Resealable Bag and seal tightly.
11. Place Resealable Bag and the Test Requisition Form inside the return package provided.

Collection Strip must be allowed to dry completely after collection. Pick a method in Step 8 to dry Collection Strip.

Requisition Form

Clearly print your Name, Date of Birth, Gender, and Collection Date. Also include Physician’s Name, Tests Requested, Billing Information, and Specimen Ship Date.
